PROGRAM OF STUDY AND RESEARCH FOR THE DOCTORAL DEGREE

To be filled out in ***Duplicate*** and submit the **ORIGINAL** to The Graduate School
(Please retain a copy for yourself)

In order to continue to register for graduate courses, this program must be submitted before the end of the first year of study for students holding a master's degree. Those holding only the bachelor's degree must file this form by completion of 12 credit hours or by the third registration, whichever comes first.

Name (Last, First) Rutenbeck, Nathan ID # 687,474

Address 261 River Road City Brooklin State ME Zip Code 04616

Degree Program PhD Concentration (if applicable) *Required for IPh.D. programs Silviculture

Course Work Proposed
(Include prerequisites.)

Course Number	Title	Credit Hours	Date Completed	Grade
MAT 437	Statistical Methods for Research	3	12/2012	A
SFR 508	Industrial Spruce-Fir Ecosystem	4	6/2013	I
SFR 699	Thesis	1	12/2012	A
MAT 50C	Hierarchical Models	3	5/2013	
SFR 475	Advanced Forest Biometry	3	5/2013	
SFR 536	Forest Stand Dynamics	3	5/2013	
SIE 512	Spatial Analysis	3	12/2013	
SFR 521	Research Methods	3	12/2013	
MAT 50C	Bayesian Statistics	3	12/2013	
SFR 699	Thesis	3	5/2014	
SFR 699	Thesis	3	5/2014	
SFR 699	Thesis	3	5/2014	
SFR 699	Thesis	3	12/2014	
SFR 699	Thesis	3	12/2014	
SFR 699	Thesis	3	12/2015

Institutional Unit Requirements (specify language and/or skill requirements and comprehensive examinations):

Human/Animal Subjects Review Committee Approval: ◯ YES ◯ NO ✔ N/A

Topic of dissertation: Regeneration Dynamics in Acadian Gap-Based Silvicultural Systems

Statement of the scope and proposed plan of treatment of the dissertation: The dissertation has four formal research goals: 1) Compare spatially explicit predictions of the SORTIE gap model to output from a spatially independent FVS statistical growth model. 2) Describe within-gap spatial variation in species composition of regeneration3) Describe the growth dynamics of retention trees and dominant regenerating individuals within harvest gaps 4) Examine patterns in photosynthesis, radiation use efficiency, and water-use efficiency in dominant regeneration across the harvest gap environment.

Signatures of Advisory Committee:
